

V8 Mock Build notes

- Connect to Remote Desktop Connection
 - always close all folders after using Remote Desktop Connection
 - always right click file -> open with Notepad++
- check C drive, which should have at least 3G, else it need to do some clean up.
- two folders are important under build.toolkit.V10: **scripts & logs**
 - scripts: all build scripts location
 - startBuild.bat

```
rm -rvf D:\build.toolkit.V10\source
git config --global core.autocrlf true
git clone --branch wc.804.fp-uncommitted
git@github02.hclpnp.com:commerce-dev/v8-release.git
D:\build.toolkit.V10\source
ant -f build.xml
```

- build.prperties

```
version_number=8
release_number=0
mod_number=4
fixpak_number=30
```

- logs:
 - failure file: publish.ee.ExtendedSites.log.zip, workspaceGetErrors.log
 - fpPackage.ee.log: package location marked at the bottom of file

```
package:
    [zip] Building zip:
D:\build.toolkit.V10\dist\ee\zipped\8.0.4.30-WCToolkit-ee-
202209261031.zip
```

D:drive -> build runtime V10--->scripts

1. goto startbuild.bat-->check branchname. It must be wc.804.fp-uncommitted

2. goto build.properties--->edit version=30

3. open the command prompt at script location and run startbuild.bat

D:\build.toolkit.V10\scripts> startbuild.bat

BUILD SUCCESSFUL

Total time: 529 minutes 7 seconds

4. After 2.30 hrs, please check D:drive -> build runtime V10-> logs -> workspace.geterrorerror code must be all zero

if not please inform build team.

after 7 hrs please check drivers

5. Location of build output of runtime package

D:drive -> build runtime V10-> folder base -> folder output.base-> "8.0.4.29-WCServer-202008260114".pak file

(To build runtime approx. time:6 hrs needed)

6. Location of toolkit zip file ---->(skip TK build today)

D:drive -> build runtime V10-> folder dist -> folder ee -> folder zipped -> "8.0.4.29-WCToolkit-ee-202008070147".zip file with timestamp.

(To build toolkit approx. time: 7.5 hrs needed)

7. share both driver and share the location with our team. Please change the permission to access.

- Jenkins login
- HCL Commerce Github02: all tasks
- e.g. common-foundation
 - click Last Success -> master branck -> Build Now
